Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Acknowledgement

1. Examiner acknowledges receipt of applicant's Formal Drawings (entered 8/25/03).

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/22/03 has been entered.

Election/Restrictions

3. Claims 13-27 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 4.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3616

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Taylor (U.S. Patent 4,991,827).

6. Regarding claim 1, Taylor discloses a suspension system as claimed in the present invention comprising:

longitudinally extending vehicle frame members 96, 97; and

a composite spring 95 with two ends, said composite spring having a sinusoidal neutral axis in a free state (Fig. 25) and transversely spanning said vehicle frame members between the parallel wheel assemblies.

7. With respect to claim 2, Taylor discloses the vehicle suspension system as claimed in the present invention, further comprising means for pivotally supporting 113-115 said composite spring between said vehicle frame members.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 8-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor (U.S. Patent 4,991,827) in view of Lawson (U.S. Patent 6,361,032).

Art Unit: 3616

10. Regarding claims 8-11, Taylor discloses the claimed invention except for the carbon fiber. Lawson discloses that it is known in the art to provide a composite spring 10, 12 comprising carbon fiber 50 spanning the length of the spring at and below the neutral axis; and glass fiber 52 spanning the length of the spring and surrounding the carbon fiber (Figs. 2, 3). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the composite spring of Taylor with the carbon fiber and glass fiber of Lawson, in order to improve the spring's stiffness while maintaining flexibility.

11. Regarding claim 12, Taylor and Lawson disclose the claimed invention except for each of the edges being formed of a 5/16" radius. It would have been obvious to one having ordinary skill in the art at the time the invention was made to form each of the edges of a 5/16" radius, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Response to Arguments

12. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
